

DR Item 2018346 to accompany Johnston, S.M., Kylander-Clark, A.R.C., and Chapman, A.D., 2018, Detrital zircon geochronology and evolution of the Nacimiento block late Mesozoic forearc basin, central California coast, *in* Ingersoll, R.V., Lawton, T.F., and Graham, S.A., eds., Tectonics, Sedimentary Basins, and Provenance: A Celebration of William R. Dickinson's Career: Geological Society of America Special Paper 540, [https://doi.org/10.1130/2018.2540\(17\)](https://doi.org/10.1130/2018.2540(17)).

Appendix DR1: notes, reference lists, and samples used to create source strata detrital zircon composite probability density plots in Figure 6 and Figure 8.

Figure 6 notes, reference lists, and samples.

Jurassic composite:

- 1) Jr foreland basin deposits
 - Dickinson et al., 2008a: Morrison Formation (CP13, CP19, CP21, CP25, CP29, CP35, CP36, CP41, CP49, CP52).
- 2) Jr arc-flank and rift deposits:
 - Dickinson and Gehrels, 2009: Mt Wrightson Formation (CP2).
 - Dickinson, et al., 2009: Cintura Formation of the Bisbee Group (KBCR).
 - Barth, et al., 2004: basal McCoy Mountains Formation (MC7, MC9).
 - Reis, J.H., 2009: Slumgullion Formation (KE10, KE10A, KE44, KE42, KE37).
 - Mauel et al., 2011: Morita and Cucurpe Formations (DM9-4-3, DM-1-6-8).
- 3) Lower–Middle Jr eolianites and associated fluvial deposits
 - Dickinson and Gehrels, 2009: San Rafael Group (CP15, CP16, CP54, CP12, CP43, CP45, Jenw, CP24), Glen Canyon Group (CP30, CP37, CP10, Jnnw, CP3, CP1, Jwnw, CP31, DOL).

Triassic composite:

- 1) Triassic miogeocline overlap sediments
 - Dickinson and Gehrels, 2008b: Chinle Formation and equivalents (CP17, CP26, CP42, CP44, CP47, CP48, CP5, CP50, CP6, Currie, TRU).
 - Dickinson and Gehrels, 2008b: Chinle and Moenkopi Formation southern feeder rivers (CP11, CP18, CP20, CP38, CP8).

Upper Paleozoic composite:

- 1) Mississippian–Permian shelf sediments
 - Gehrels and Dickinson, 2011: Grand Canyon stratigraphy (Surprise Canyon 1, 2, 3, Watahomigi, Manacacha, Wescogame, Esplanade 1, 2, 3, Lower Hermit, Hermit, Upper Hermit, Coconino 1, 2, Toroweap 1, 2, Kaibab 1, 2).

Lower Paleozoic composite:

- 1) Cambrian–Devonian shelf sediments
 - Gehrels et al., 2011: Grand Canyon stratigraphy (Tapeats 1, 2, Lower Bright Angel, Bright Angel, Upper Bright Angel, Temple Butte 1, 2, 3).

Paleozoic allochthons

- 1) Golconda allochthon
 - Riley, et al., 2000: Schoonover Q, Schoonover V, Jory Fm., Pumpernickel Fm.
- 2) Roberts Mountain allochthon
 - Gehrels and Dickinson, 1995: Harmony Fm., Valmy Fm.
 - Gehrels, et al., 2000: Harmony LC#2, Harmony LC#3, Harmony LC#4, Harmony Elbow Canyon, Harmony (Harmony Canyon), Harmony Hot Springs, Lower Vini,

Lower Vin #2, Upper Vini, McAfee Quartzite, Snow Canyon Formation, Elder Sandstone, Slavern Chert.

Neoproterozoic–Cambrian outer shelf

1) White–Inyo Range sediments

- Chapman, et al., 2015: Poleta Formation (12WI1), Harkless Formation (12WI2), Deep Springs Formation (12WI3), Wyman Formation (12WI4, 12WI5, WM208, WM170), Reed Dolomite (12WI6), Campito Formation (11IY1, 568, WM611, WM101).

Neoproterozoic inner shelf

- 1) Death Valley sequence: Because some parts of the section were more heavily sampled in the Mahon, one or two representative samples from each formation were chosen from this dataset in order to avoid dilution of undersampled sections in the composite probability density function.
- Schoenborn, et al., 2012: Stirling Quartzite (NR9, NR30), Johnnie Formation (J39A, J14A).
 - Mahon et al., 2014: Noonday Dolomite (2CD11, 4CD13), Kingston Peak (4RM11), Beck Springs Dolomite (11RMSS5) Horse Thief Springs Formation (5CD11, 12RMSS6, 12RMSS5), Crystal Spring Formation (K03DV04).

Figure 8 notes, reference lists, and samples.

All data sets were filtered for zircon >300 Ma for the construction of these plots.

1) Blue Mountains:

- LaMaskin, et al., 2011: Snowshoe Fm. (06135), Lonesome Fm. (07016, IZEE7, IZEE9).

2) Sacramento Valley

- Surpless, et al., 2002: Stony Creek petrofacies at Cache Creek (GV64).
- Surpless, et al., 2006: Stony Creek petrofacies (JC14, JC12, JC20, JC17, JC18, JC19, KDS108).

3) Peninsular Ranges:

- Kimbrough, et al., 2014: Eugenia Fm. (V0510, V0520), Peñasquito Fm. (LUSARDICYN).

4) Basal McCoy Mountains:

- Barth, et al., 2004: McCoy Mountains Fm. (MC7, MC9).

5) Lower Gravelly Flat:

- Martin and Clemens-Knott, 2015: Gravelly Flat Formation (G VG103).

6) Colorado Plateau Jurassic composite:

- Dickinson and Gehrels, 2008a: Morrison Formation (CP13, CP19, CP21, CP25, CP29, CP35, CP36, CP41, CP49, CP52).
- Dickinson and Gehrels, 2009: Mt Wrightson Formation (CP2).
- Dickinson, et al., 2009: Cintura Formation of the Bisbee Group (KBCR).
- Barth, et al., 2004: basal McCoy Mountains Formation (MC7, MC9).
- Reis, J.H., 2009: Slumgullion Formation (KE10, KE10A, KE44, KE42, KE37).
- Mauel et al., 2011: Morita and Cucurpe Formations (DM9-4-3, DM-1-6-8).

- Dickinson and Gehrels, 2009: San Rafael Group (CP15, CP16, CP54, CP12, CP43, CP45, Jenw, CP24), Glen Canyon Group (CP30, CP37, CP10, Jnnw, CP3, CP1, Jwnw, CP31, DOL).
- 7) Neoproterozoic inner shelf composite: Because some parts of the section were more heavily sampled in the Mahon, one or two representative samples from each formation were chosen from this dataset in order to avoid dilution of undersampled sections in the composite cumulative probability plot.
- Schoenborn, et al., 2012: Stirling Quartzite (NR9, NR30), Johnnie Formation (J39A, J14A).
 - Mahon et al., 2014: Noonday Dolomite (2CD11, 4CD13), Kingston Peak (4RM11), Beck Springs Dolomite (11RMSS5) Horse Thief Springs Formation (5CD11, 12RMSS6, 12RMSS5), Crystal Spring Formation (K03DV04).
