

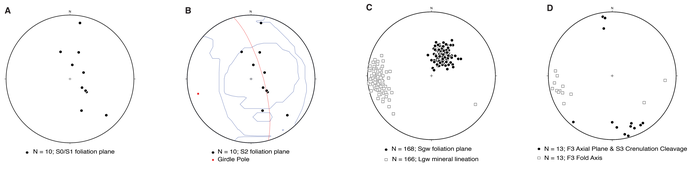
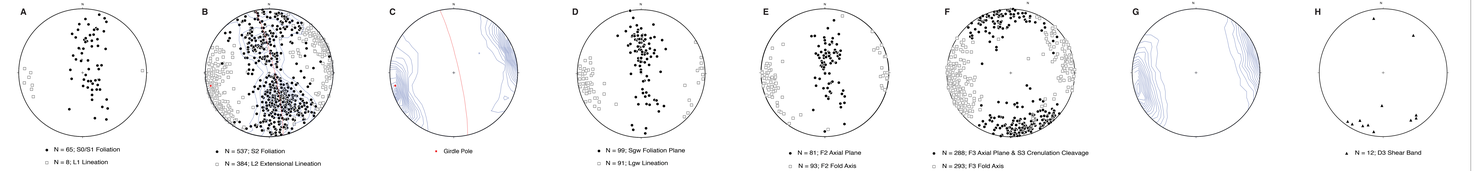
Equal-area stereographic projection plots summarizing orientation data from Domain 2HG in the Harry's Gulch transect. A. S0/S1 foliations. B. Kamb contour plot of S2 foliations, with Lext lineations. C. Sgw foliation and Lgw lineations. D. F2 axial planes with F2 fold axes. E. F3 axial planes and S3 crenulation cleavage with F3 fold axes. F. D3 shear bands.



Equal-area stereographic projection plots summarizing orientation data from Domain 1HG in the Harry's Gulch transect. A. S0/S1 Foliation and mineral lineations. B. Kamb contour plot of S2 foliations. C. Sgw foliation and Lgw lineations. D. F3 axial planes and S3 crenulation cleavage with F3 fold axes.



Equal-area stereographic projection plots summarizing orientation data from the Fan Glacier/Bremner Glacier area. A. S0/S1 Foliation and mineral lineations. B. Kamb contour plot of S2 foliations with Lext lineations. C. Kamb contour plot of Lext lineations. D. Sgw foliation and Lgw lineations. E. F2 axial planes with F2 fold axes. F. F3 axial planes and S3 crenulation cleavage with F3 fold axes. G. Kamb contour plot of F3 fold axes. H. D3 shear bands.
