

Supplemental Material

Corchete, V., 2020, Crustal and upper mantle structure beneath the South China Sea and Indonesia: GSA Bulletin, <https://doi.org/10.1130/B35641.1>.

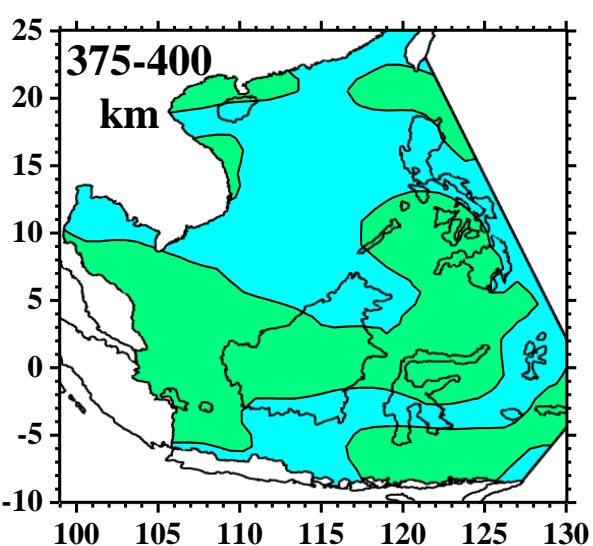

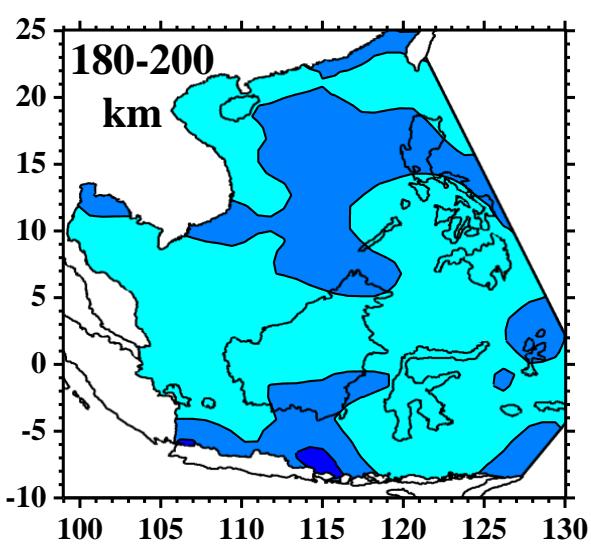

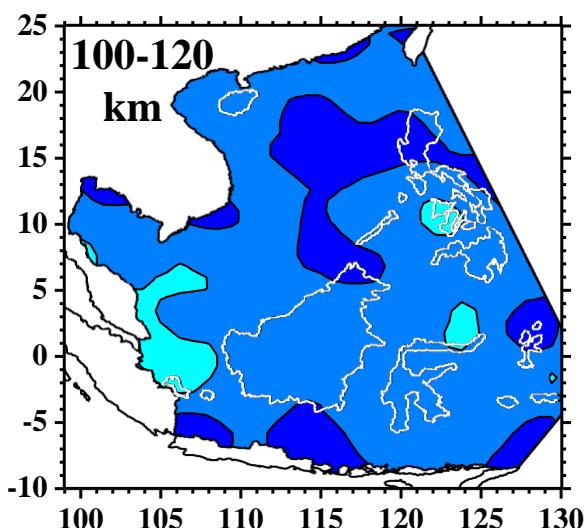

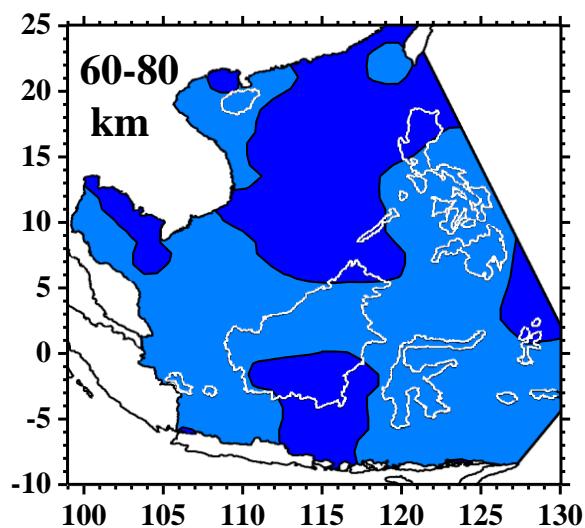

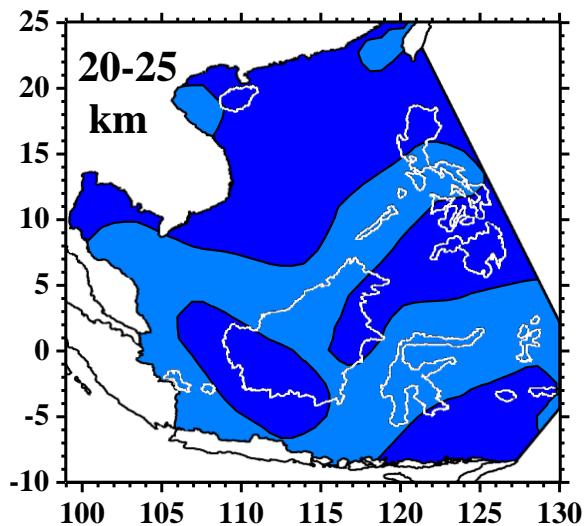

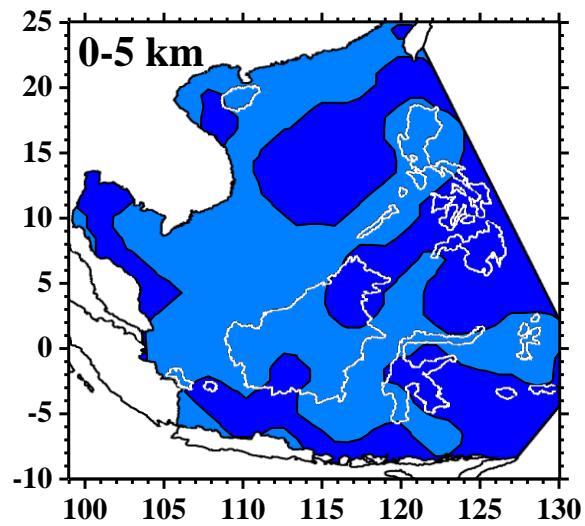

Supplemental Material

Figure S1. Geographical distribution of the 1-sigma errors arisen in computation of the S-velocities shown in Figure 3. The interval between isolines is 0.01 km/s.

Figure S2. Resolution maps of the inversion process performed to calculate the S-velocities shown in Figure 3, plotted from 0 (not resolved) to 1 (perfect resolution). The interval between isolines is 0.1.
