Data Repository Figure 1. A: Stratigraphic ranges for foraminifera taxa in the Sass de Putia, Italy, section (data, sample numbers and lithology as in Broglio Loriga and Cassinis, 1992). The vertical scale is in meters relative to the datum chosen at the base of the Tesero horizon as defined in Broglio Loriga and Cassinis (1992). In all diagrams, fossil occurrences are indicated by dots. B: Terminations of ranges of Late Permian foraminifera in the Tesero, Italy, section (data, sample numbers and lithology as in Broglio Loriga and Cassinis, 1992). C: Terminations of ranges of Late Permian foraminifera in the Monte Ruche, Italy, section (data from Broglio Loriga and Cassinis, 1992). D: Terminations of ranges of Late Permian foraminifera from the Dierico, Italy, section (data from Buggisch and Noe, 1986).
