

**TABLE 1. MORPHOMETRIC MEASUREMENTS OF DEPRESSIONS ON HORIZONS D AND E AND THE SEAFLOOR.**

	<b>Horizon D (n=55)</b>	<b>Horizon E (n=41)</b>	<b>Seafloor (n=12)</b>
<b>Depression depth (m)</b>			
average	23.6	32.5	19.8
min	7.8	10.6	8.6
max	56.4	64.3	31.0
median	22.6	32.7	18.9
<b>Downslope-facing flanks (degrees)</b>			
average	13.0	13.3	6.8
min	4.2	5.5	4.6
max	21.5	21.8	9.3
median	13.0	13.0	6.7
<b>Upslope-facing flank (degrees)</b>			
average	-2.3	-4.8	-3.4
min	-14.1	-17.0	-6.9
max	7.6	0.7	0.3
median	-1.7	-4.3	-3.6
<b>Depression width (across channel) (m)</b>			
average	293.1	404.2	531.3
min	125.0	137.5	362.5
max	587.5	750.0	850.0
mode	337.5	375.0	462.5
median	287.5	381.3	531.3
<b>Depression length (along channel) (m)</b>			
average	405.1	448.2	397.9
min	162.5	162.5	238.0
max	800.0	1062.5	612.5
mode	337.5	325.0	350.0
median	343.8	406.3	362.5
<b>Depression length:width ratio</b>			
average	1.5	1.2	0.8
min	0.6	0.5	0.4
max	3.1	2.0	1.5
mode	1.5	2.0	
median	1.4	1.1	0.7
<b>Depression area (km<sup>2</sup>)</b>			
average	0.11	0.16	0.40
min	0.02	0.03	0.13
max	0.36	0.50	3.14
mode	0.11	0.03	0.16
median	0.08	0.13	0.16
