Bicknell, R.D.C., Ortega-Hernández, J., Edgecombe, G.D., Gaines, R.R., and Paterson, J.R., 2021, Central nervous system of a 310-m.y.-old horseshoe crab: Expanding the taphonomic window for nervous system preservation: *Geology*, v. 49, <https://doi.org/10.1130/G49193.1>

Supplemental Figure S1: Part and counterpart of YPM IP 168040. (A) YPM IP 168040, part. (C) YPM IP 168040, counterpart. Scale bars all 5 mm.

Supplemental Figure S2. SEM backscatter images and elemental maps of examined CNS of *Euproops danae*. (A) Backscatter image of CNS. Boxes show close-ups in B–S. (B) Backscatter image of CNS-matrix boundary. (C–J) Elemental maps of carbon, magnesium, aluminum, silicon, sulfur, potassium, iron, and lead, respectively, for the area in (B). (K) Backscatter image of anterior margin of CNS. (L–S) Elemental maps of carbon, magnesium, aluminum, silicon, sulfur, potassium, iron, and lead, respectively, for the area in (K). Scale bars (A) 500 μm , (B, K) 50 μm . Scale bar in B applies to C–J. Scale bar in K applies to L–S.
